

MOISTURE ANALYSER STANDARD

PRODUCT NUMBER 5850

Laboratory scales for medical and industrial applications

- › Weighing range: 50 g
- › Division 0.001 g
- › Back-lighted LC-Display
- › Data basis for 20 drying procedures

MOISTURE ANALYSER STANDARD

PRODUCT NUMBER 5850

Features

Moisture analysers are measuring devices especially designed for determining the moisture content of relatively small samples of different materials. The sample materials are first weighed and afterwards, are processed in a drying process. The exact moisture of the sample can be retrieved from the difference of the initial weight and the weight of the sample after the drying process. The application area of moisture analysers ranges from the use in laboratories to industrial and commercial applications.

- > Data basis for 20 drying procedures
- > Drying mode: standard drying, mild drying, step drying, preheating
- > Switch off criteria: manually, if the set time is up or if the weight loss per time unit goes below the set value, both values can be set individually
- > GLP/GMP printouts and reports
- > Halogen lamps

Technical data

- > Dimensions of the chamber: 120 x 120 x 120 mm
- > Temperature range: max. 160°C (optional max. 250°C)
- > Emitter: 400 W
- > Operating temperature: + 15° till + 40° C
- > Power supply: Mains adapter 230 V 50 Hz AC, 9 V DC
- > Interface RS 232
- > Real time clock
- > Power supply included in delivery scope
